## **Continuous auditing - Wikipedia**

Intuitively I agree it is quite laborious to repeat each check but the audit is just that mechanic such that most of the time it is basically file check then

content check. Basically audit check is driven in this fashion - artefact check. The better way to verify is always to have penetration testing for interactive validation.

## Configura... | RSA Link

Continuous auditing is an automatic method used to perform auditing activities, such as control and risk assessments, on a more frequent basis. Technology plays a key role in continuous audit activities by helping to automate the identification of exceptions or anomalies, analyze patterns within the

digits of key numeric fields, review trends, and test controls, among other activities.
