BizTalk 2013 EDI for Healthcare  
- EDI 834 Enrollment Solutions  
eliminates the complexity  
and demonstrates how to build  
both inbound and outbound EDI  
834 processes in BizTalk server  
that follow the required  
patterns for integrations with  
these exchanges. Archiving,  
mapping, reconstituting EDI 837  
data, exception handling and  
advanced logging and reporting  
(without the need for BAM!) are  
all covered in enough detail to  
allow you to implement your own  
fully functional solution.

Building a successful health  
care claims processing EDI

implementation in BizTalk  
Server can be complex.

Decisions must be made around  
how to extract and publish  
data, how to map to the 837 EDI  
standard, and how to  
appropriately batch and deliver  
data. If architected properly,  
your BizTalk solution can be  
highly efficient, simple, and  
something that can be managed  
and extended for years to come.
