By "if auto focus was ever engaged", I assume you mean the auto focus button in manual focus mode. I too can confirm it seems to happen more frequently when the auto focus button is used but it still occurs even when not used. This appears to be a focus shift bug ala X100(S). This needs to be addressed by Fuji.

This is the 51st in a series of posts on the Fujifilm GFX-50S. The series starts here. I am reading many complaints about photographers who are having difficulty in manually focusing the Fuji GFX, both with the native focus-by-wire lenses and adapted ones. I have developed what I think are highly accurate ways to focus the camera.

Photography is a form of exploration and this time we will touch a bit on moving beyond native lenses into the bigger playground together with Fujifilm X-mount cameras. History: Focusable

lenses itself have been around since the early 1800s and considering that autofocus did not appear until the 1980s, there is potentially quite a lot of manual focus lenses with interesting character waiting ...

[Using Manual Lenses With the Fuji X System - Roy Cruz Photo](#)

From its humble beginnings, the Fujifilm autofocus system has come an extremely

long way. With the X-T1, Fujifilm really started to up the game and provide a reliable and reasonably fast autofocus system. Then they updated it to firmware 4.0 and gave us much more than we expected that little camera to be capable of. Then came the third generation sensor with its X Processor Pro, and that was ...

[Fujifilm X-S1 - Photo Review](#)

The X-S1 is designed for efficient access to manual controls and offers a large number of buttons to directly control the camera with little use of the menu system. This kind of efficiency makes it usable in a hurry. There is also a fly-by-wire manual focus ring which serves its

purpose well.

Fstoppers

One of my two cameras is the Fujifilm X100F, which offers manual focus, and has some “Focus Assist” features which are really useful. First, you want to set the camera to use both auto and manual focus. Go to the AF MF Menu and turn AF+MF On. This means that the camera will use auto-focus when you press the shutter halfway.

Camera tests the large ...

The XS1 Fuji Camera works great. Haven't found any con's yet, all positives. Has so many shooting functions and options I've just barely scratched the surface of possibilities. I like the manual zoom as that's what I used back in the day. I'm not fond of the power zooms of today although they make sense on the smaller cameras.

[Losing focus in manual focus mode - Fuji X-H1 - Fuji X Forum](#)

Panasonic FZ300 features a 25-600 mm F2.8 24x zoom lens whereas Fujifilm X-S1 features a 24-624 mm F2.8-5.6 26x zoom lens. Fujifilm X-S1 has 1mm wider coverage than the Panasonic FZ300. Both cameras has a max aperture of f2.80 at the wide end. On the tele end, Fujifilm X-S1 has 24mm longer telezoom reach than the Panasonic FZ300.

[Fujifilm X-S1 Review - Specifications | Photography Blog](#)

There are obviously more than a few options and opinions about possible long lenses while waiting for the Fuji 100-400. You're obviously going to have to settle for manual focus, but it is workable. I'd suggest being very careful in buying film era lenses. Older telephotos aren't as good as their modern counterparts.
