The TSD Long-Travel stages provide twice the travel range of the standard stage. They feature Opto Sigma's EXC™ precision bearing ways, the world's first to be processed directly into the body of a translation stage resulting in the highest stiffness, straightness and smoothness of any stage on the market. All TSD stages are made entirely from hardened tool steel and are plated with an RoHS-Compliant black chrome.

Manual Stages. Thorlabs' manual translation stages are offered in a range of maximum travel distances, from less than 1/4" (6 mm) to 2" (50 mm) and longer for our long travel, large area platforms. Many of these stages can be ordered in multi-axis configurations, providing XY or XYZ translation. In addition to standard linear translation stages, we offer rotation mounts, pitch and yaw platforms, and goniometers.

These stages can be utilized to carry a laser head or to carry payload instead of a roll to roll type process. Some applications we have developed this for have also been in an XY long travel format where the Y axis was mounted to a gantry above a 2500mm X axis stage. At 240mm wide and from 800mm to 2500mm in length, this drop in stage is ideal for applications in the laser and additive manufacturing industry for cutting, welding and material carrying with very high precision.

[Long Travel Manual Stage - givelocalsjc.org](#)

The manual linear stage uses crossed roller guide which ensures the high precision and smooth of motion. The main material of the manual linear stage is aluminum alloy, so the weight of manual linear stage is very light and the stage can be easily built in other equipment. This translation stage uses precision ground screw with 1mm pitch. It ...
