Cannibalism involves eating other humans, which is not nice, but even worse, it can kill you, too. Human beings have been eating each other for a long time, with mixed consequences. The first known case dates back 100,000 years, when Neanderthals in France ate their kind, according to the BBC. There were 15,000-year-old remains, both adult and child, found in a cave near Bristol in England that show signs of cannibalism: "They de-fleshed and disarticulated the bones, then chewed and ...

That is so creepy. What's worse, cannibalism is alive and well today. I recently read an article about one Brazilian man and two women who were arrested for making empanadas out of their murder victims. In 2008, six Russian teenagers killed and ate four people, but not before cooking them in a bonfire. And last year in Pakistan, two men confessed to digging up dead bodies and cooking them in curry.
