Start a container with a volume. If you start a container with a volume that does not yet exist, Docker creates the volume for you. The following example mounts the volume myvol2 into /app/ in the container.. The -v and --mount examples below produce the same result. You can't run them both unless you remove the devtest container and the myvol2 volume after running the first one.

[Metricbeat Reference \[7.10\] | Elastic](#)

PostgreSQL's transition relations. Great news! PostgreSQL 10 is out. Release notes look amazing and there are a lot of new, wonderful changes and additions. In my personal list, the most desirable are improvements related to parallel queries which have been introduced in 9.6.
