*The Future of Human Nature is Habermas' sole foray into bioethics. It is also a bit of an anomaly in his body of work. Habermas has spent his career insisting on the distinction between ethics (Sittlichkeit) and morality (Moralität). Ethics, is his parlance, has to do with the good life and always refers to the self-understanding of a particular individual or group.*

*Human nature is a concept that denotes the fundamental dispositions and characteristics—including ways of thinking, feeling, and acting—that humans are said to have naturally. The term is often used to denote the essence of humankind, or what it 'means' to be human. This usage has proven to be controversial in that there is dispute as to whether or not such an essence actually exists.*
