[The Vegetative State Medical Facts](#)

The vegetative state is a condition of complete unawareness of the self and the environment, accompanied by sleep-wake cycles. The qualifier "persistent," which is sometimes added to the term, has a variety of definitions. Some have objected to its use, claiming that it is ambiguous and arbitrary and suggests irreversibility.

"Persistent vegetative state" has been arbitrarily defined as a vegetative state still present one month after acute traumatic or non-traumatic brain damage but does not imply irreversibility [3]. "Permanent vegetative state" denotes irreversibility. The Multi-Society Task Force on PVS concluded that three months following a non-traumatic brain damage and 12 months after traumatic injury, the condition of vegetative state patients may be regarded as 'permanent' and therefore ...
