[Two Billion Cars Driving Toward](#)

Two Billion Cars is a very informative book on transportation and sustainability issues. The premise of the book is that currently we have one billion cars, but in twenty years, the planet will have about two billion cars. If there are no changes, this growth in cars will be disastrous in terms of energy usage, congestion, and global warming.

At present, there are roughly a billion motor vehicles in the world. Within twenty years, the number will double to 2 billion, largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in oil-rich nations is on the rise, does this mean that matters will only get worse?
