The Child Attachment Checklist contains 28 items; 16 of the items came from a checklist developed and used by Evergreen Consultants. Twelve additional items were developed by Dr. Buenning and added to the original 16 to produce the 28-item Child Attachment Checklist. The checklist is appropriate for 5 years of age and older, including teenagers.

Reactive Attachment Disorder Treatment, RAD

Reactive Attachment Disorder Checklist (RAD-C):

The RADC (Hall, 2007) was developed for the study based on the DSM-IV criteria to be completed by the current primary caregiver. The RAD-C is composed of 17 questions regarding the child's/adolescent's typical behavior.
