As many of you know there are occasion where the Faraday's induction Law ($E = - S \cdot dB/dt$) cannot be applied. There are some paradoxes where the calculation with $E = -S \cdot dB/dt$ cannot be done, so it is not a general equation .

Dr. Meyl discovered a fundamental mistake in Maxwell's Equations. By fixing these equations, Meyl was able to elegantly derive Tesla's results as well as explain many other unexplained physical effects in science.
