Goat Medicine by Mary C. Smith - Goodreads

With the exception of fenbendazole administered at the 5 mg/kg dose, these drugs are not approved by the Food and Drug Administration (FDA) for use in goats, and when used in goats are considered extra label use. Fenbendazole at the recommended dose rate of 10 mg/kg is also considered extra-label usage.

10 Goat Medications No Goat Owner Should Be Without

Goats metabolize medications differently than other animals; drugs clear their system faster. As a result, goats require higher doses of drugs for effective treatment. Most of the drugs available for use on livestock are not labeled for use in goats and so are not labeled with the correct dose for goats.

Goat Drugs and Dosages - Health/Medications - GOATWORLD.COM

In most cases, goats that are experiencing pain can be treated with non-steroidal anti-inflammatory drugs (NSAIDS), and you can often use the same over the counter medications you would use for your own pain relief. For instance, many goat farmers swear by regular Aspirin, and it is often the first thing a veterinarian will recommend as well.
