Oracle Service Bus Documentation

Documentation for developers that describes how to design, secure, test, and deploy Oracle Service-Oriented Architecture (SOA) composite applications consisting of service and reference binding components and Oracle BPEL process,

human task, business rule, Oracle Mediator, and spring service components.

Oracle Service Bus Documentation

Oracle® Service Bus 10g Release 3 Maintenance Pack 1 (10.3.1) . Oracle Service Bus is a core element of distributed services networks. It

enables a service-oriented architecture (SOA), allowing accelerated service re-use, interoperability, and deployment.

Developing Services with Oracle Service Bus

Oracle Service Bus is at the heart of Oracle's comprehensive business integration solution and belongs to the Oracle

Messaging product line. Oracle Service Bus is primarily targeted for managing different types of services, and providing traditional message brokering across heterogeneous IT environments.
