### **Industrial Plasma Cutters for sale | In Stock | eBay**

Plasma Cutting works by having an inert gas blown at high speed. An electrical arc is simultaneously created through and around the gas being blown, forming plasma. This plasma is hot enough to cut metal very quickly and precisely. Plasma Cutting is a service offered by most Metal Supermarkets stores.

### **Plasma Cutting - Handheld**

Plasma Cutters are a quick and efficient way of cutting metal. When you purchase the correct machine for the thickest metal you will cut- your work and clean up are done in more than half the time. However if you purchase one too small for the job at hand, you will spend twice the time you would with a torch.

you need a single part, batch of prototypes, or a production order.

### **Plasma Cutting Service - eMachineShop**

Plasma cutting grew out of plasma welding in the 1960s, and emerged as a very productive way to cut sheet metal and plate in the 1980s. It had the advantages over traditional "metal against metal" cutting of producing no metal chips, giving accurate cuts, and producing a cleaner edge than oxy-fuel cutting. Early plasma cutters were large, somewhat slow and expensive and, therefore, tended to be ...
